Body Memory And Architecture Yale

"[Body, Memory, and Architecture] attempts to show how the human body is at the center of one's understanding of architectural form. Because this humanism has been virtually eliminated from architectural thought today, the authors suggest that new considerations of the body be reintroduced to redirect contemporary building."—Publisher's Weekly

Body, Memory, and Architecture - Blogger

The unit contains activities to show the students the significance of how the human body is related to architecture. Architecture is a visual art but it is also important for the students to learn how to experience it. The students I teach live in an urban environment so I will frequently refer to city architecture.
