Brake Mcsas With Cummins E Brake, your engine (B5.9, ISB, C8.3, ISC or ISL) creates up to 237 hp of retarding power to help you slow down. You use your service brakes less so they last up to three times longer. And having more braking power on long, steep hills can help reduce the risk of overheating and glazing.

Does anyone have any experience adding a Jake Brake (engine compression brake, NOT exhaust brake) to an ISC engine? I see the parts required can be bought (used) at a reasonable price at a number of salvage operations. The changeover looks fairly straightforward, with the Jake Brake components essentially replacing the existing rocker arm supports.
