Once the installation is complete, just reboot and select "Xen 4.x.x" from the GRUB2 menu. If on Fedora 18 and 19, you will likely see something like "Xen 4.2.x". If on Fedora 16 or 17, it will have "Xen 4.1.x" in it. It is also possible that you only see something like "Fedora, with Xen hypervisor", and that is also ok.
