both become fleshy and edible. The apple flower of most varieties requires cross-pollination for fertilization. When harvested, apples are usually roundish, 5–10 cm (2–4 inches) in diameter, and some shade of red, green, or yellow in colour; they vary in size, shape, and acidity depending on the variety.

Carve the apple into  
four equal chunks.

First, arrange the apple  
upright on a cutting  
board. Then, use a  
sharp knife to cut the  
fruit in half directly  
through the core.

Finally, slice each of  
these halves in half  
along the stem axis.

You should have four
