Rudin, Chapter #2

Dominique Abdi 2.1.

Prove that the empty set is a subset of every set. Solution. Assume the contrary, that there is a set E such that the empty set is not a subset of E . Then there is an element $x \in E$ such that $x \notin \emptyset$, but this contradicts that the empty set is empty.

Hence $\emptyset \subseteq E$. 2.2.

Theorem 8.3: Let $\{a_{ij}\}_{i=1, j=1}^{\infty}$ be a double sequence of complex numbers and suppose that for every i the series $\sum_{j=1}^{\infty} a_{ij}$ converges and furthermore that $\sum_{i=1}^{\infty} \sum_{j=1}^{\infty} |a_{ij}|$ converges as well. Then $\sum_{i=1}^{\infty} \sum_{j=1}^{\infty} a_{ij} = \sum_{j=1}^{\infty} \sum_{i=1}^{\infty} a_{ij}$; where all the series involved converge.
