The cabover truck design is outdated for the North American highway infrastructure. But they are still the gold standard in Europe, Australia and Japan. Truck manufacturers in these countries still make this body style as their lengths laws are still quite rigid, and the cabover style allows for trailer length to be maxed out.

A tag-a-long bike is also known as a trailer cycle. It is essentially a child’s bicycle with the front wheel, fork and headset replaced by a long towbar or boom. It fits to the back of an adult’s bike to form an articulated tandem. You and your child can make trips that are faster, further and safer than you could manage on separate bikes.
