GrowGood is a 501(c)3 non-profit organization based in Los Angeles which uses urban agriculture to transform communities. We target underserved groups and believe in the power of food to unite people and to lay foundations for healthy communities. Our first project is an urban garden and therapy s

GrowGood

In addition to choosing a variety of hemp to grow, farmers will need to determine how they will grow, harvest, and handle the crop. Innovations in agriculture for other crops have created numerous opportunities for better cultivation, more consistent yield, as well as regenerative and sustainable practices for farmers considering hemp cultivation.

Growing Hemp | Successful Farming

And to build a stronger agricultural economy for future generations, we work to improve both domestic and international markets, to create new income opportunities - like renewable energy - for America's producers, and to grow the next generation of American farmers. If you're new to farming and want to start a farm, start here.

Farming | USDA

Out of all the crops that farmers grow, the government only subsidizes five of them. 2 They are corn, soybeans, wheat, cotton, and rice. Grains provide 80% of the world's caloric needs. Grains can also be stored and affordably shipped. The top five states receiving subsidies are Texas, Nebraska, Kansas, Arkansas, and Illinois.
