Physiology (/ ˌ f ɪ z i ˈ ɒ l ə dʒ i /; from Ancient Greek φύσις (physis) 'nature, origin', and -λογία (-logia) 'study of') is the scientific study of functions and mechanisms in a living system. As a sub-discipline of biology, physiology focuses on how organisms, organ systems, individual organs, cells, and biomolecules carry out the chemical and physical functions in a living ...

I primi studi fisiologici risalgono alle antiche civiltà dell'India e all'Egitto, dove venivano condotti insieme agli studi anatomici, senza l'utilizzo della dissezione o della vivisezione. Lo studio della fisiologia umana come campo medico risale almeno al 420 a.C. ai tempi di Ippocrate, noto come il padre della medicina. Ippocrate incorpora questa scienza alla sua teoria degli umori, che si ...

Swimming exercise at optimal speed may optimize growth performance of yellowtail kingfish in a recirculating aquaculture system. Therefore, optimal swimming speeds ( $U_{opt}$  in  $m\ s^{-1}$  or body lengths  $s^{-1}$ ,  $BL\ s^{-1}$ ) were assessed and then applied to determine the effects of long-term forced and sustained swimming at  $U_{opt}$  on growth performance of juvenile yellowtail kingfish.

La vejiga natatoria es un órgano de flotación que poseen muchos peces óseos. Se trata de una bolsa de paredes flexibles llena de gas y se encuentra en el celoma, justo bajo la columna vertebral. Los peces óseos tienen un peso específico ligeramente por encima del agua. La vejiga natatoria controla la flotabilidad neutral del pez en el agua, sin la necesidad de un esfuerzo muscular.

Herzfrequenz beim Menschen. Die Herzschlagfrequenz beim Menschen ist abhängig von der Belastung, vom Alter und von der körperlichen Fitness. Ein Neugeborenes hat in Ruhe eine Herzschlagfrequenz von ca. 120 Schlägen pro Minute, während ein 70-Jähriger eine Frequenz um die 70 Schläge pro Minute aufweist. Die Herzschlagfrequenz beträgt bei einem gesunden Menschen in Ruhe 50 bis 100

Nitric Oxide and Endothelial Cell Dysfunction. A major conceptual advance in the field of Vascular Cell Biology was the demonstration that the endothelial lining is a source of various autocrine factors that can influence the behavior of other types of cells within the vessel wall (pericytes, smooth muscle) and in the circulating blood (platelets and leukocytes).
