Basic Trauma Life Support Questions

The Advanced Trauma Life Support ® (ATLS ®) program can teach you a systematic, concise approach to the care of a trauma patient. ATLS was developed by the American College of Surgeons (ACS) Committee on Trauma (COT) and was first introduced in the US and abroad in 1980.

Advanced Trauma Life Support

Trauma often engenders a crisis of faith (Frankl, 1992) that leads clients to question basic assumptions about life. Were the individual's core or life-organizing assumptions (e.g., about safety, perception of others, fairness, purpose of life, future dreams) challenged or disrupted during or after the traumatic event?

PHTLS : Pré Hospital Trauma Life Support

Clinicians in the intensive care unit (ICU) often care for patients who are on several life support measures at once. When such a patient is dying and the decision is reached to withdraw life support, these clinicians may make an imperfect compromise in seeking to balance the complex needs of the patient and the patient's family — they may remove the life support measures one at a time ...
