A-level BIOLOGY (7402/3)

Biology is the scientific study of life. It is a natural science with a broad scope but has several unifying themes that tie it together as a single, coherent field. For instance, all living organisms are made up of cells that process hereditary information encoded in genes, which can be transmitted to future generations. Another major theme is evolution, which explains the unity and diversity ...

The role of microorganisms in causing and sustaining cancers has been in dispute for centuries. Through the lens of gut- and tumor-associated microbes, Sepich-Poore et al. review our current understanding of the microbiota in cancer, building a “microbially conscious” framework. The authors argue that humans should be considered as a meta-organism, but how our microbiota influences cancer ...
