Its allows light to pass through and reach the vision-sensing tissue at back of the eye, the retina. If the cornea becomes swollen, this can result in cloudy vision. Possible causes of a swollen cornea include wearing a tight or over-worn contact lens, an eye infection, a corneal scratch and hereditary cornea diseases 3. Most of these ...

Causes of a Cloudy Film on the Eye | Healthfully

In the original photograph, there was a bit of haze over the image and the stars weren't very sharp. Using this Look, the stars are much sharper, the contrast is more appealing, and interesting red and purple tones have been drawn out. This Look instantly boosts the night sky without making the overall image too dark.

Now that you're facing Northwest, you'll notice a little bit of a haze over the area. Where is it coming from you may ask? Let's do some digging. FIRST: Let's see where our wind is. These are the current conditions as of 10 AM Thursday. You will notice that the wind is out of the Northwest, so take a look in that direction.
