A conditioned stimulus that signifies that an aversive is coming. Used to deter or interrupt behavior; if the behavior halts or changes, the aversive may be avoided. For example, a trainer that says “ack” to interrupt a behavior, or the warning beep of a shock collar when a dog gets too close to the boundary of an electric fence.

From learning activities to transitions, children’s challenging behavior can influence every aspect of a classroom. This disruption often can overwhelm early childhood teachers, who report feeling concerned and frustrated about classroom management (Hemmeter, Ostrosky, & Corso 2012) as well as underprepared to address challenging behavior proactively (Stormont, Lewis, & Covington Smith 2005).

biological perspective holds the belief that most or all abnormal behavior can be attributed to genetic and environmental influences on physical functioning. A genetic predisposition (sometimes also called genetic susceptibility) is an increased chance of developing a disease or pattern of behavior based on the genes we inherited from our parents (and our ...

What Causes Abnormal Behavior? - Lumen Learning

Constructivism is a theory in education that recognizes learners construct new understandings and knowledge, integrating with what they already know. This includes knowledge gained prior to entering school. It is associated with various philosophical positions, particularly in epistemology as well as ontology, politics, and ethics. The origin of the theory is also linked to Jean Piaget's ...

A change in behavior like this can indicate something she doesn't want to face or say. So it comes out in different ways. Since it seems her behavior is slightly evasive or repelling towards you (I'm guessing), then you might be what she doesn't want to face. I'm making assumptions, only you know your situation. But changing things up a ...

by luck, chance, or fate. Support for this pro-posed conceptual similarity of externals and helpless individuals was provided by studies of verbalized expectancies for success in tasks of skill (Klein & Seligman, 1976; Miller & Seligman, 1975). Helpless subjects gave smallj expectancy changes, which suggests a belief¹

Learned Helplessness in Humans: Critique and Reformulation

Michael Rozin: Behavior profiling is at times mistakenly looked at as an intuition-based security concept. While intuition always plays a role in humans' ability to survive a dangerous situation, the professional behavior profiling security system is based on: 1) an extensive operational research of common aggressors' tactics, techniques

Environmental psychology is an interdisciplinary field that focuses on the transactions between individuals and their surroundings. It examines the way in which the natural environment and our built environments shape us as individuals. Environmental Psychology emphasises how humans change the environment and how the environment changes humans experiences and behaviors.
