Mendel's principle of dominance states that 1. segregate 2. multiple alleles, multiple genes 3. b 4. c 5. d 6. a 7. some alleles are dominant and others are recessive. 2.

### Chapter 11 Introduction To Genetics Summary

Genetics is the study of how genes bring about characteristics, or traits, in living things and how those characteristics are inherited. Genes are specific sequences of nucleotides that code for particular proteins. Through the processes of meiosis and sexual reproduction, genes are transmitted from one generation to the next.
