The history of chemistry represents a time span from ancient history to the present. By 1000 BC, civilizations used technologies that would eventually form the basis of the various branches of chemistry. Examples include the discovery of fire, extracting metals from ores, making pottery and glazes, fermenting beer and wine, extracting chemicals from plants for medicine and perfume, rendering ...

History of chemistry - Wikipedia

The 4th edition had hardly any example problems throughout the entire text. The author remedied this in the 5th edition. There are multiple example problems that are well discussed in each chapter on the main topics. Also, the text was reorganized a bit and of course the page numbers and homework problems are a little different than the 4th ...

Bicarbonate is an electrolyte that is used by the body to help maintain the body's acid-base (pH) balance. The bicarbonate test measures the total amount of carbon dioxide (CO₂) in the blood, which occurs mostly in the form of bicarbonate and is used to help detect conditions that cause electrolyte and acid-base imbalances.
