Biological classification is the scientific procedure of arranging organisms in a hierarchical series of groups and sub-groups on the basis of their similarities and dissimilarities.

NCERT Solutions For Class 11 Biology Biological Classification

Question answering is very dependent on a good search corpus—for without documents containing the answer, there is little any question answering system can do. It thus makes sense that larger collection sizes generally lend well to better question answering performance, unless the question domain is orthogonal to the collection.

Important Questions for Class 10 Science CBSE Chapter Wise

In a rooted tree, the branching indicates evolutionary relationships (Figure 3). The point where a split occurs, called a branch point, represents where a single lineage evolved into a distinct new one.A lineage that evolved early from the root and remains unbranched is called basal taxon.When two lineages stem from the same branch point, they are called sister taxa.
