Computing for clinicians (Book, 1988) [WorldCat.org]

Clinicians collaborate with other health care and information technology professionals to develop health informatics tools which promote patient care that is safe, efficient, effective, timely, patient-centered, and equitable. Many clinical informaticists are also computer scientists.

Health informatics - Wikipedia

GE Healthcare this week launched its new Edison HealthLink, a new edge computing technology designed for the needs of healthcare providers. WHY IT MATTERS The new offering is designed to help clinicians more easily "collect, analyze and act upon critical data closer to its source," according to GE Healthcare.

GE Healthcare unveils new edge computing tools for clinicians

The widespread use of cloud computing has altered the clinical trial design process. Whereas three or four years ago it would take a statistician perhaps two or three days to design five clinical trial designs, a well-resourced statistician can now simulate and model well over 100,000 designs in less than 30 minutes.

11.12.20 -- Clinical Development In The Era Of Cloud-Computing

Clinical research computing is the application of computational methods to the broad field of clinical research. With the advent of modern digital computing, and the powerful data collection, storage, and analysis that is possible with it, it becomes more relevant to understand the technical details in order to fully seize its opportunities.
