Intriguingly, the Mopho can also be hooked up to other Dave Smith synths via the poly chain socket in order to increase polyphony. Unfortunately, we didn't have another DSI synth on hand to try it out but the same feature seems to work well with the Tetra and Prophet 08 so in theory this should be a real bonus for owners of multiple DSI products.

Dave Smith Instruments have flourished since the small but perfectly-formed Evolver hit the streets a decade ago. In that time, DSI have extracted more mileage from Curtis chips than Tesco have extracted former Grand National runners from freezers. So while the Mopho X4 is brand new, it looks and sounds familiar.
