A database management system stores data in such a way that it becomes easier to retrieve, manipulate, and produce information.

## Characteristics

Traditionally, data was organized in file formats. DBMS was a new concept then, and all the research was done to make it overcome the deficiencies in

A database-

# Download Ebook Dbms By P K Yaday Ebulaiv

management system (DBMS) is a collection of interrelated data and a set of programs to access those data. This is a collection of related data with an implicit meaning and hence is a database. The collection of data, usually referred to as the database, contains information relevant to an enterprise. The primary goal of a DBMS is
