Abstract. This study models simultaneously three commonly used indicators of fear of crime — feeling unsafe alone at home after dark, feeling unsafe walking alone after dark and worry about becoming a victim of crime — against direct (being a victim) and indirect (knowing a victim) victimization, controlling for demographic and socioeconomic characteristics of individuals via multivariate, i.e. multiple responses, multilevel analysis of data from Athens, Greece.

Fear of crime : interpreting victimization risk (Book ...

Ferraro examines how people interpret their risk of criminal victimization and identifies who is most likely to be afraid of crime. Although many previous studies of fear of crime do not explicitly consider the concept of risk or perceived risk in estimating the prevalence of fear, the approach taken here considers perceived risk as central to the entire interpretive process.

Fear of Crime

of victimization risk, coupled with the potential negative impact fear of crime can have both psychologically (e.g., undue anxiety) and behaviorally (e.g., school absenteeism, avoidance of social...

(PDF) Fear of Crime - ResearchGate

Being a victim of crime can be a very difficult and stressful experience. Learning to understand and feel more at ease with the intense feelings can help victims cope.

Coping with Crime Victimization — FBI

Some studies have found that victimization experiences increase fear of crime (Ferguson & Mindel, 2007; Katz, Webb, & Armstrong, 2003); others have found that victimization experiences decrease fear of crime (Mesch, 2000a); and others have found that victimization has no effect on fear of crime (Ferraro, 1995). Further research has focused on the role of vicarious victimization.
