Labview

Object Oriented Programming (OOP) is a programming language model that revolves around objects and not actions. Historically, it was viewed as a procedure that takes input, processes the data, and gives output. Web developers across the world learn Object Oriented Programming with Python to achieve a number of goals.

To select a graphical object in an object-oriented graphics program, you usually just click on the object with the pointer. When you select it, a set of handles, little black squares, appear on or around the object (compare marquee). By dragging the handles, you can change the size or shape of the object or the curviness of any curved lines.
