### Harley Engine Sputters

So, what causes a motorcycle to sputter? There are several reasons why a motorcycle sputters. The most common reasons are carburetor issues such as a vacuum leak, fuel leak, or tuning issues. Other culprits could include corroded or cracked spark plugs or spark plug wires, a faulty ignition coil, a clogged air filter, or engine timing issues.

### 5 Reasons Why Your Motorcycle Is Sputtering

The problem of having an engine "sputter" is typically caused by a fuel system issue. For pit bikes with smaller cc displacement engines, in order for a cylinder to fire efficiently, three separate components must work together; the fuel delivery system (carburetor), the ignition coil and wires and the spark plug.

### My bike is sputtering whenever I give it full throttle

Hi Gang, Got to tell you I love my new 1200 C!! One question; how do I get rid of a engine sputter off idle? I think it is carburetor related; I live at about 3500 feet above sea level and I have punctured the baffles. No other mods. Thanks in advance!

### Engine sputter off idle | V-Twin Forum

So this past weekend my bike [2012 Custom], has developed a new problem, I don't lose any electrical power, only the engine starts to buck, kick, stumble and pop. At an idle it will either idle high at just under 1800 rpms or stall out. It's intermittent, but has been occurring more and more...

### Engine bucking, stalling, high idle, sputtering | Road Glide

The engine sputter can be caused by a variety of factors and you will need to carefully examine each component to identify which component is not working. Some of the parts you may need to replace include the spark plugs, wires, rotor or the distributor cap.

Harley sputters at cruising speeds, but idles fine and goes great full throttle My bike has fuelie pipes on it with cones, and an s and s shorty carb and the motor is the twin cam 88. it has 28k on it and has never run poorly except after sitting for a while, and i know it is the gas gumming up the carb.

### Harley sputters at cruising speeds, but idles fine and ...

The cam chain system is a vital component in the functioning of a Harley's Twin-Cam engine. Zeroing in on this specific cam component can make you as a buyer aware of its potentially faulty design. The cam chain system of a Harley is designed with plastic shoes that ride on the cam system.

### The 8 Most Common Harley-Davidson Problems & How to Handle ...

Well, I have been having the same problems that many of us on here are having with an iradic idle, hesitation under load, and sputtering up to like 3000 rpm. My idle was so bad it started dieing on its own. I took my car to the shop, and this is what was done. 1. Changed both o2 sensors ( I had a check engine light) 2. replaced fuel pump

### Harley Engine Sputters - mallaneka.com

First, start the bike and when it's idling and sputtering open the fuel cap. If it stops, you know that it's a clogged vent line. Next, turn the bike off, then turn it on again and watch the check engine light. If it comes on then goes off after about 4 seconds there's no code. If it stays on you have a current code.
