System x3650 M4 - IBM

System x3650 M4 server. The System x3650 M4 server features Intel Xeon multicore processors that support internal processing speeds of up to 3.3 GHz 3, and processing operations to memory up to 1600 MHz. High-performance server subsystems The System x3650 M4 server expands the new server line by adding a higher level of processor power. This high-throughput, two-way multicore network server offers excellent performance and scalability when you add memory and a second processor.
