DNA Definition. Deoxyribonucleic acid, or DNA, is a biological macromolecule that carries hereditary information in many organisms. DNA is necessary for the production of proteins, the regulation, metabolism, and reproduction of the cell. Large compressed DNA molecules with associated proteins, called chromatin, are mostly present inside the nucleus.

I guess Brad Pitt playing him on Saturday Night Live really did go to his head. Donald Trump was not having any of this and issued this statement earlier today that pretty much covered his view on all of the China Virus cover-up including Fauci being infallible with science.

Donald Trump Compares Dr. Fauci and His Views to Science ...

A facial is a sexual activity in which a man ejaculates semen onto the face of one or more sexual partners. A facial is a form of non-penetrative sex, though it is generally performed after some other means of sexual stimulation, such as vaginal sex, anal sex, oral sex or masturbation. Facials are regularly portrayed in pornographic films and videos, often as a way to close a scene.
