### Language Maintenance And Language Shift

Language maintenance denotes the continuing use of a language in the face of competition from a regionally and socially more powerful language. Language shift is the opposite of this: it denotes the replacement of one language by another as the primary means of communication within a community. The term language death is used when that community is the last one in the world to use that language.

When shifting right, the type of shift depends on the type of the value being shifted. (As background for those readers unfamiliar with the difference, a "logical" right shift by 1 bit shifts all the bits to the right and fills in the leftmost bit with a 0. An "arithmetic" shift leaves the original value in the leftmost bit.
