Rear-projection video walls. Using projection instead of LCD or direct-view LED technology, rear-projection video walls target different applications. They are mainly used in control rooms that operate in a 24/7 mode. Utilities providers, for example, generally rely on rear-projection technology to monitor their network.

TV Repair Cost. TV repair costs between \$60 and \$350 with most spending \$207 on average for LCD, LED, plasma, and 4K TVs; costs are higher if repairing older DLP, projection, and HD TVs. TV problems like display issues, powering-on problems, or sound issues can be fixed. Pickup and delivery fees may apply.

2021 TV Repair Costs | LED, LCD & Flat Screen

8. With rear projection, can see the projector through the screen. The base of the screen is only about 2' off the ground, so the audience can see the projector if they are not sitting. Have to put the projector pretty much on the ground. A higher screen is better. 9. Not very good with short cast projectors with any air movement.
