History. The Beretta 92 pistol evolved from earlier Beretta designs, most notably the M1923 and M1951. From the M1923 comes the open slide design, while the alloy frame and locking block barrel, originally from Walther P38, were first used in the M1951. The grip angle and the front sight integrated with the slide were also common to earlier Beretta pistols.

### Beretta 92 - Wikipedia

In fact, it's an advantage, but more on that later. The Beretta 92 series have tons of different models out there, and the line up is still expanding with the new X series. The 92FS is the most popular model, and it's what the military adopted as the M9 in 1985. The Beretta 92FS is 9mm only, with the 96 being a .40 S&W caliber variant.

### Beretta 92FS [Review]: True Wonder 9 - Pew Pew Tactical

Introduced in 1977, the Beretta 92S is distinctive as it is the first modification of the original Beretta 92. The 92S is far closer to modern Beretta pistols than its predecessor, as the 92S made major modifications that are still used today, such as adding an early slide-mounted combined safety and decocking lever, which replaced the 92's frame mounted manual thumb safety.
