wish. You can use certain flags that serve as permissions to instruct kali to give what privileges to which user. r= lets a user read the file. w =enables a user to edit a file (write or delete). x = Grants permission to execute the file or search a directory.

### **The 22 most basic commands of Kali Linux - Linux Hint**

As a beginner's guide it is helpful. It would benefit from being slightly longer and making a better explanation on a few points. There's nothing about trouble-shooting, and if anything doesn't 'work' one is left searching the internet for answers (which can be difficult as much that is out there relates to CentOS 6 and/or assumes more knowledge of Linux than a beginner would have).
