Acgih Industrial Ventilation Manual - seapa.org

edition of the ACGIH design ventilation manual. Page 3-15 states that the density factor should be used often to account for all changes in air density. The exceptions are in the case of no heat or moisture added to the system, shop location near sea level, and a system static pressure (SSP) of < 12 "wg (Ref 9).

VENTILATION TECHNICAL GUIDE,

Hoods must meet the design criteria in the ACGIH Industrial Ventilation Manual or applicable OSHA standards. Most hood design recommendations account for cross-drafts that interfere with hood operation. Strong cross-drafts can easily reduce a hood's effectiveness by 75%. Standard hood designs may not be adequate to contain highly toxic materials.
