The availability of analytic data has propelled marketing forward in many ways, helping to identify patterns and behaviors that can shape marketing messages as well as improve product development.

### The Formula For Balancing The Math And Magic Of Marketing

Understanding learner value helps you make better decisions about marketing cost. If your earlier math is correct, and each learner is worth an average of \$900, and 80% of that income needs to be dedicated to business expenditures, and 70% of the remainder toward future growth, then that leaves  $(\$900 \times .2 \times .3) = \$54$ .

### Marketing Math: How Much Should You Pay for a Learner ...

ROI: Return on Investment Marketing Contribution MINUS Overhead Contribution (typically % of sales) = Net Profit ROI = Net Profit \$ marketing cost \$10,000 net profit / \$50,000 marketing cost = 20% ROI (the return on the investment before interest and taxes) 5 © 1991 - 2013 ResponseFX.com, a Division of Strategic Marketing and Advertising, Inc.

### Marketing Math: Key Metrics to Maximize Marketing Dollars

Marketing? That is for artists, dreamers. It's the easy business course. With all love and respect possible, I refrained from responding, but in my head, I laughed. What I love about marketing is that it is full of math, but it is math that you can see in real world applications on a daily basis. For example, my marketing text books were filled with equations calculating the marketing growth, the growth rate, market share, cost, price elasticity and other such calculations.
