Math 11 Foundations | Ms. Della's Blog

A mathematical model is a description of a system using mathematical language. Mathematical models are used not only in the natural sciences and engineering disciplines but they are also used in biology, economics and sociology. Mathematical models can range from simple to complex. Keep reading to learn how to build a mathematical model.

How to Make a Mathematical Model: 9 Steps (with Pictures)

In Algebra 1, students worked with simple exponential models to describe various real-world situations. In Algebra 2, we go deeper and study models that are more elaborate. Our mission is to provide a free, world-class education to anyone, anywhere.
