Team Strategies and Tools to Enhance Performance and Patient Safety 2.0 (TeamSTEPS®) is a core curriculum initially developed for use in hospitals and adapted to other settings. It is a customizable "train the trainer" program plus specialized tools to reduce risks to patient safety by training clinicians in teamwork and communication skills.

AHRQ Patient Safety Tools and Resources | Agency for ...

For many years, health care providers have worked to collect so-called patient-reported outcomes measures, or PROMs, which are measures of function and health status reported by patients.

A Simple Way to Measure Health Care Outcomes

Patient outcomes reflected in the endorsed measures are important and the act of measurement has without question generated selective attention and resource allocation toward reducing complications. However, this may be accompanied by the diversion of attention and resources away from other, perhaps equally important, patient needs.

Outcome Measurement in Nursing: Imperatives, Ideals ...

Actionability: Patient education materials are actionable when consumers of diverse backgrounds and varying levels of health literacy can identify what they can do based on the information presented. PEMAT was designed to be used by healthcare providers, health librarians and others tasked with providing high-quality materials to patients or consumers.
