Teleology (from τέλος, telos, 'end', 'aim', or 'goal,' and λόγος, logos, 'explanation' or 'reason') or finality is a reason or explanation for something as a function of its end, purpose, or goal, as opposed to as a function of its cause. A purpose that is imposed by a human use, such as the purpose of a fork to hold food, is called extrinsic.

Teleology - Wikipedia

Botany, also called plant science(s), plant biology or phytology, is the science of plant life and a branch of biology.A botanist, plant scientist or phytologist is a scientist who specialises in this field. The term "botany" comes from the Ancient Greek word βοτάνη (botanē) meaning "pasture", "herbs" "grass", or "fodder"; βοτάνη is in turn derived from βόσκειν (boskein ...

Botany - Wikipedia

Figure 6.1 A hummingbird needs energy to maintain prolonged periods of flight. The bird obtains its energy from taking in food and transforming the nutrients into energy through a series of biochemical reactions. The flight muscles in birds are extremely efficient in energy production.

The nearly simultaneous introduction of cell fractionation and electron microscopy in the late 1940s provided the needed research techniques and, as noted in Section 1, helped establish modern cell biology (Bechtel 2006; Matlin 2018). In addition to the linkage of microsomes to the endoplasmic reticulum, described above, researchers linked ...
