PROBABILITY : It is a concept of mathematics which measures the degree of certainty or uncertainty of the occurrence of events.. If any event can happen in m ways and fails in n ways and each of the $(m + n)$ ways are equally likely to occur, then probability of the happening of the events is defined as the ratio, $m/m+n$ and that of its failing as $n/m+n$.

In economic statistics (econometrics) time series analysis is important. These are the reasons why instead of just a general introductory book in fields like biostatistics and engineering statistics specialized texts are needed. There are several good texts for engineers but there are not many that are as current or encompassing as Ryan's text.
