Overqualification, is associated with job dissatisfaction. While Formal Overqualifica-tion has been increasing over time, Real Overqualification has been steady or rising only slowly. The normative implication drawn is that the state should provide regular information on the distribution of the returns to graduate education. JEL classifications: I20, J24, J28. 1. Introduction

Overqualification, job dissatisfaction, and increasing ...

Real Overqualification, but not Formal Overqualification is associated with job dissatisfaction. Formal Overqualification has been increasing over time, and in 2006 characterised nearly one in four graduates. Real Overqualification has been steady or rising only slowly; in 2006 it affected less than one in ten graduates. Conditioning on graduates being matched to graduate jobs, it is found that there is no significant increase in the dispersion of returns to graduate education.

Kent Academic Repository

Overqualification and underutilization of skills is associated with job dissatisfaction (Green and Zhu, 2010). At company level, probably is better to have employees with a high level of education, skills and good qualification doing the same work as employees who are less qualified and they fulfil their goals.

JOB MISMATCH Article EFFECTS ON WORK PRODUCTIVITY

Overqualification, job dissatisfaction, and increasing dispersion in the returns to graduate education

Overqualification, job dissatisfaction, and increasing ...

Abstract We report increasing dispersion in the returns to graduate education in Britain, and relate this development to rising overqualification. We distinguish 'Real'and 'Formal'overqualification, according to whether it is

Overqualification, job dissatisfaction, and increasing ...

Thus, the P-E fit theory approach argues that overqualification results in job dissatisfaction through a lack of psychological need fulfillment (i.e., for autonomy, competence, and relatedness) as well as inadequate levels of extrinsic rewards (e.g., salary) due to the generally lower-level nature of these jobs.

Too good for your job? Disentangling the relationships ...

Job satisfaction trends indicate uneasiness among nurses In February 2020, at the cusp of the pandemic in the U.S., nurses were generally satisfied with their jobs. Only 30% expressed an interest in finding a new job, which aligns with figures Wolters Kluwer has seen year-over-year: a roughly 30% job dissatisfaction rate.
