It is called with a list of strings (actually file/directory names) and is expected to return a list of strings. The code can be used to sort the file/directory names alphabetically, numerically, or to filter out directory entries based on their name alone. When follow or follow\_fast are in effect, preprocess is a no-op. #postprocess

Welcome to the Eismar Cove Free Files Directory. There are a lot of files here, but BEWARE. Some are several years old or older. Use a file with care. Make sure it is appropriate for your use. Many of these files have been donated to the site from one person or another over the years. Some are recent, some are not.
