To check your pulse by hand, find a stopwatch, timer, or clock with a second hand. Then, gently press your index and third finger on your neck to the side of your windpipe. Once you feel your heartbeat, start your timer or keep an eye on your watch while you count the number of heartbeats for 30 seconds.

The Pulse WattNode meter includes three diagnostic LEDs—one per phase. During normal operation, these LEDs flash on and off, with the speed of flashing roughly proportional to the power on each phase. The LEDs flash green for positive power and red for negative power. Other conditions are signaled with different LED patterns.
