The Cunetio Hoard, also known as the Mildenhall Hoard, is the largest hoard of Roman coins found in Britain. It was discovered in 1978 at the site of the Roman town of Cunetio, near modern-day Mildenhall, Wiltshire, and consisted of 54,951 low value coins. The coins were contained in a large pot and a lead container.

The Snettisham Jeweller's Hoard is a collection of Romano-British jewellery and raw materials, found during the construction of a house in the Norfolk village of Snettisham in 1985. The hoard is thought to be the working stock of a jeweller, buried in a single clay pot around 155 AD.

Snettisham Jeweller's Hoard - Wikipedia

It seems to me that many British Roman coin hoard discoveries in recent years result from farmers, or equipment operators working in fields (and occasional amateur metal detectorists) digging up (mostly glazed) earthen ware vessels containing relatively small amounts of coins possibly buried by anxious merchants or landowners to protect their savings (no banks in those days) and never retrieved due to the owner's death, etc.

British Roman Coin Hoards | Coin Talk

Normally coins in Britain come from the mint of Rome, or nearer, but Severan hoards often contain coins minted in Syria and Egypt - presumably a 'rush job'. The last emperor represented in the Shapwick hoard is Severus Alexander (222-235).

Author:Abdy, Richard

One idea that might spring immediately to mind is that the coins were so debased that it was just not worth the owners while to go and dig them up. So they just got forgotten about. Exactly this suggestion was put up by Anne Robertson in her "Inventory of Romano-British Coin Hoards" 2000.
