The base assumption is that SAP systems within one SAP landscape need to communicate with each other and with many other software components deployed in the company, independent of their deployment form. There also should be no differences introduced by the deployment form for the end user connecting with SAP GUI or other interfaces.

The SAP Java Connector (SAP JCo) is a development library that enables a Java application to communicate with on-premise SAP systems via SAP's RFC protocol. It combines an easy-to-use API with unprecedented flexibility and performance. The SAP JCo supports both communication directions: inbound Remote Function Calls (Java calls ABAP) as well as outbound Remote Function Calls (ABAP calls Java).
