Proceedings | CHI 2021

Flexibility, agility, and the ability to pivot continue to be essential characteristics of winning companies. Organizations must have the right tools and products so they can break down information silos, better understand the experiences of their customers and employees, uncover trends, expand collaboration, deploy AI and machine learning appropriately, and take advantage of automation to ...

KMWorld 100 Companies That Matter in Knowledge Management 2022

While self-training is potentially an effective method to address this issue, the pseudo-labels it yields on unlabeled data could induce noise. In this paper, we use two means to alleviate the noise in the pseudo-labels. One is that inspired by the curriculum learning, we refine the conventional self-training to progressive self-training.

Proceedings of the 2021 Conference on Empirical Methods in ...

In this work, we develop a weak supervision framework (ASTRA) that leverages all the available data for a given task. To this end, we leverage task-specific unlabeled data through self-training with a model (student) that considers contextualized representations and predicts pseudo-labels for instances that may not be covered by weak rules.
