Spring Framework Annotations Spring Framework

Spring framework provides a variety of annotations for a better approach. Using annotations, we can develop Spring applications (small & large scale) easily with less code. Following are the annotations used in the Spring framework:

@Component - The

Starting from Spring 2.5 it became possible to configure the dependency injection using annotations. So instead of using XML to describe a bean wiring, you can move the bean configuration into the component class itself by using annotations on the relevant class, method, or field declaration. Annotation injection is performed before XML injection.

Thus, the latter
