The Rational Unified Process Made

Introduction to Rational Unified Process. The Rational Unified Process (RUP) is a software development process. Rational Software Corporation develops it; now, it is part of IBM from 2003. It controls the development process and produces a high-quality software product. It is nothing but a model for the software development process. This ...

Rational Unified Process | Phases Involved in the Rational ...

What is a Rational Unified Process (RUP)? Rational Unified Process (RUP) is an agile software development method, in which the life cycle of a project, or the development of software, is divided into four phases. Various activities take place during these phases: modelling, analysis and design, implementation, testing and application.
