**The Acoustics of the Singing Voice**  
Slowly, science journals are returning to a preference for the active voice, and university science departments are following suit, though they have lagged behind somewhat. Several influential science journals— Science , Nature , and the British Medical Journal , among others—are quite explicit in this preference.

**How to Use Active Voice in the Sciences | Writing Advice**  
The rationale for using the passive voice in scientific writing is that it achieves “an objective tone”—for example, by avoiding the first person. To consider scientific writing, let’s break it up into two main types: lab reports and writing about a scientific topic or literature.

Scientists have discovered that when a woman is fertile, her voice sounds more seductive to men. And women react more strongly to men with deeper voices. One study in particular found that men who heard a woman’s voice could get tingles in their skin. The fact that this can happen based of just the sound of someone’s voice is wildly cool.
