#### Transactions - WNBA

A transaction is a single unit of work. If a transaction is successful, all of the data modifications made during the transaction are committed and become a permanent part of the database. If a transaction encounters errors and must be canceled or rolled back, then all of the data modifications are erased.

#### Transactions (Transact-SQL) - SQL Server | Microsoft Docs

In PowerShell, a transaction is a set of one or more commands that are managed as a logical unit. A transaction can be completed ("committed"), which changes data affected by the transaction. Or, a transaction can be completely undone ("rolled back") so that the affected data is not changed by the transaction.
