There is also a "long scale," which is used in France and was previously used in the United Kingdom, in which a billion means one million million. According to this definition of a billion, the number is written with a one followed by 12 zeros. The short scale and long scale were described by French mathematician Genevieve Guitel in 1975.

How Many Zeros Are in a Million, Billion, and Trillion?

Zero the most important digit for creating large numbers. Large numbers above 100,000 have groups of three zeros separated by commas. A million has six zeros, a billion has nine, and a trillion has 12.
